AVA™

AQUASIGHT
INTELLIGENT WATER SOLUTIONS

Introducing Aquasight's

AI Water Assistant

Utility Intelligence Made Easier

AVA is Aquasight's AI Utility Agent built for water and wastewater teams. It turns complex operational data into clear, plain-language guidance—showing what's happening, why it's happening, and what to do next. Designed for lean utilities, AVA helps your team stay proactive, compliant, and efficient without needing specialized data expertise.

AVA turns data/images into guidance

- Explains what's happening in your system
- Shows why it's happening
- Provides next-step actions in operator-friendly language
- Built to support both field staff and leadership reporting

### Built with safety & compliance at the core

- Risk-aware, cautious guidance
- Designed for water + wastewater operations
- Utility-grade reasoning tuned for real-world workflows
- Supports compliance reporting & operational accountability

Cuts through noise to highlight what matters

- Detects anomalies early
- Surfaces only the most important insights
- Helps understaffed teams stay proactive
- Reduces operator data hunt and alarm fatigue

Get expert utility guidance in seconds

Real-Time Operational Clarity

- See what's happening across your utility in seconds
- Plain-language explanations operators can trust
- Reduces data noise and highlights the events that matter

Actionable Guidance, Not Just Alerts

- Understand the "why" behind anomalies
- Get recommended next steps tailored to utility workflows
- Supports safer, more proactive operations
